

Custom Chirped Gratings

Cost-Effective Laser Pulse Shaping Components!

**Your single source for custom design, prototyping
and manufacturing.**

Advantages Include:

- ***Cost-Effective Manufacturing:*** Proprietary replication material and processing technology is scalable for volume manufacturing.
- ***Optical Design:*** Custom-designed gratings with linear or non-linear chirped profiles for high performance pulse modification.
- ***Development Flexibility:*** Proprietary replication technology allows for unique state-of-the-art grating solutions.
- ***Repeatable Performance:*** Replication provides consistent part-to-part performance throughout your product's life cycle.
