

# Microlens Arrays

## Prototype to Production Without Compromising Quality

## YOUR SINGLE SOURCE FOR CUSTOM DESIGN, PROTOTYPING, AND MANUFACTURING

### Advantages include:

- **Cost effective manufacturing:** Proprietary replication material and processing technology is scalable for volume manufacturing.
- **A variety of polymers to choose from:** Refractive indices ranging from 1.4 to 1.71 are available.
- **Wafer-level and panel production:** Up to 450mm diameter wafers and GEN3.5 panels are supported.
- **Thermally stable polymers:** Suitable for assemblies requiring solder reflow and/or automotive/aerospace applications.
